EXPERIENCE

INFORCE • Configuration Engineer

October 2025 - Present

- Designed and developed OneShield Enterprise workflows and UI components to support policy administration processes.
- Effective OneShield Enterprise Module Training for insurance application development.
- Delivered custom configurations for insurance modules, ensuring compliance with client requirements.
- Collaborated with cross-functional teams to troubleshoot and optimize system performance.
- Created technical documentation for developed software components.
- Created and optimized PL/SQL scripts and Oracle packages to extract data from multiple sources for reporting purposes.
- Collaborated with a team to design and build various database models.
- Developed backend services for a web application using Spring Boot as part of a backend team.
- Participated in code reviews within a development team.
- Observed cloud infrastructure workflows and deployment practices in AWS environments.
- Performed debugging and log analysis to identify and resolve application issues.

PROJECTS

The Time | TypeScript, Angular, Firebase

September 2025

- Developed a real-time web game based on “The Mind” card game to entertain kids during free time.
- The solution utilized Firebase Realtime Database for synchronization and Static Hosting for frontend content delivery.
- Built responsive frontend components with an emphasis on intuitive user experience.

Game Room | Java, Spring Boot, MySQL

November 2024

- Developed a web application using Spring Boot.
- Implemented Spring Security, providing both stateful and stateless authentication to ensure role based secure access.
- Enhanced the application with Java Mail Sender and configured the SMTP port to enable user communications.
- Wrote and executed JUnit test cases for backend modules.
- Delivered user documentation detailing application functionalities and usage guidelines.

TECHNICAL SKILLS

Languages: Java, TypeScript, Kotlin, C#, PL/SQL

Frameworks: Spring Boot, Angular, .NET

Developer Tools: IntelliJ, Visual Studio, VS Code, Git, Docker, Google Cloud Platform, AWS, Firebase

Databases: Oracle, MySQL

EDUCATION

University of Kragujevac, Bachelor's Degree in Information Technology • 2020 - 2024
